	A DAVA
QH	a second DNA segment operably linked to the first DNA sequence, the second
$P \mid$	DNA sequence encoding a heterologous glycoprotein, wherein the heterologous glycoprotein is
,	an immunoadhesin.
·	This is a second of the DNA encoding the
R 2	5. (Amended) The DNA construct of claim [1] 2 wherein the DNA encoding the
P	mammalian t-PA pro-sequence is operably linked to a pre-sequence other than a mammalian t-
	PA pre-sequence.
0 >	7. (Amended) The DNA construct of claim [6] 5 wherein the immunoadhesin is a
B>	Λ
	TNF receptor immunoadhesin.
t	9. (Amended) The DNA construct of claim 5 wherein the mammalian t-PA pro-
04	sequence is operably linked to a pre-sequence associated with the native heterologous
18	polypeptide.
	polypepinde.
,	14. (Amended) A DNA construct comprising a first DNA segment encoding a
RS.	precursor polypeptide; and a second DNA segment operably linked to the first DNA [sequence]
P	segment, the second DNA [sequence] segment, encoding a heterologous glycosylation site
	variant glycoprotein
50P	
	30. (Amended) A cultured enkaryotic host cell comprising a DNA construct
26	comprising: a first DNA segment encoding a precursor peptide corresponding to a mammalian
	tissue plasminogen activator secretory peptide; and a second DNA segment operably linked to
Linear Control	the first DNA [sequence] segment, the second DNA [sequence] segment encoding a
i	heterologous glycosylation site variant.
1	
f	Please add and consider new claims 34-46.
and or charge and	(New) A DNA construct comprising a first DNA segment comprising a nucleic
07	acid sequence that encodes mammalian t-PA pro-sequence operatively linked to a nucleic acid

sequence that encodes a pre-sequence other than a mammalian t-PA pre-sequence; and a second

DNA segment operably linked to the first DNA segment, wherein the second DNA segment encodes a heterologous glycoprotein.

(New) The DNA construct of claim 34, wherein the heterologous glycoprotein is an immunoadhesin.

3 36. (New) The DNA construct of claim 36, wherein the immunoadhesin is a TNF receptor immunoadhesin.

(New) The DNA construct of claim 3, wherein the TNF receptor immunoadhesin is TNFR1-IgG1.

38. (New) The DNA construct of claim 34, wherein the heterologous glycoprotein is a glycosylation site variant glycoprotein.

(New) The DNA construct of claim 34, wherein the mammalian t-PA prosequence is operably linked to a pre-sequence associated with the native heterologous polypeptide.

(New) The DNA construct of claim 29, wherein the heterologous glycoprotein is a TNF receptor immunoadhesin and the pre-sequence is a pre-sequence of a mammalian TNF receptor.

(New) The DNA construct of claim 40, wherein the mammalian t-PA prosequence is SEQ ID NO. 7.

(New) The DNA construct of claim 4, wherein the pre-sequence is SEQ ID NO.

(New) The DNA construct of claim 42, wherein the TNF receptor immunoadhesin is TNFR1-IgG1.
